

Saranac I

A pellet fireplace insert is an economic and efficient way to heat your living space. When you upgrade that dusty, drafty wood-burning fireplace to a sealed pellet firebox, you will realize the virtues of burning wood in pellet form. The 50# hopper capacity allows you to burn for extended periods of time without the mess and hassle of constantly feeding split wood into the fireplace. Available with a thermostat, just set it and forget it.

Features:

- 50,000 BTU's
- Fully automatic controls and fuel feed
